

Demonstration of Proposed Features

Date	14 July 2026
Team ID	SWTID-2026-7049
Project Name	Emotion Detection & Learning Support Engine (AI Learning Assistant)
Maximum Marks	1 Mark

This document captures all features proposed during the project planning phase and tracks whether each was successfully implemented and demonstrated — including the two that were consciously scoped out, rather than showing only what shipped.

S.No	Feature Name	Description	Status	Demonstrated	Remarks
1	Dual-model emotion detection	BiLSTM + BERT classify the problem text into 5 emotion classes.	Implemented	Yes	Shown in Results screenshots (both scenarios)
2	Mixed-emotion detection	Detects when two emotions are close instead of forcing one label.	Implemented	Yes	Visible as "Confused + Curious" in Model Comparison
3	Trust-adaptive decision engine	Combines both models into a final emotion + trust level + reason.	Implemented	Yes	"How I Decided" panel shows both a HIGH and a MEDIUM trust example
4	AI-generated response	Empathetic, field-aware response via Gemini/OpenRouter.	Implemented	Yes	Shown in the "Your Guidance" section
5	Template fallback	Deterministic canned response when AI is off or fails.	Implemented	Yes (code-verified)	Exercised whenever AI toggle is off; verified via scripts/demo_analysis_pipeline.py
6	Model comparison / How I decided	Side-by-side raw predictions + decision reasoning.	Implemented	Yes	Shown with Show Details switched on
7	Session history & CSV logging	Opt-in interaction logging, timestamped in IST.	Implemented	Yes	CSV Examples counter visible in the sidebar throughout
8	Analytics dashboard	Emotions tab (pie + timeline) and Fields tab (bar chart).	Implemented	Yes	Both tabs shown in the walkthrough
9	CSV-based retrieval prediction	Predict from previously saved similar examples.	Pending	No	Disabled stub, clearly labeled "planned feature" in the UI itself
10	Bring-your-own LLM API key	Let each user supply their own key.	Dropped	No	Evaluated and consciously deferred — see EPIC5_POLISH_BACKLOG.md

Feature Implementation Summary

Metric	Value
Total Features Proposed	10
Total Features Implemented	8
Total Features Demonstrated	8
Overall Implementation Rate (%)	80%
